

Punjab Clean Air Action Plan (test fixture)

Source apportionment for Lahore identifies diesel vehicles at 28 percent and two-stroke exhaust at 8 percent of measured high PM_{2.5} concentrations.

Measure 1: Establish a low emission zone removing 36 percent of vehicle emissions in the central district by 2030.

Measure 2: Increase urban tree canopy cover by 25 percent across the metropolitan area through a sustained plantation drive.

Measure 3: Undertake avenue plantation along major arterial roads.

Measure 4: Reduce sulfur content in diesel fuel to 10 parts per million under revised fuel quality standards.

Measure 5: Mandate catalytic converters on all newly registered vehicles and establish an annual inspection and certification regime.
